## IT-Administrator (m/f/x) / Systems Integrator (m/f/x) specialized in infrastructure management 3rd Level Support

### Description

**“TECHNOPHILE” – in keeping with this motto, we provide future-oriented and individual IT infrastructure solutions for mid-sized companies.** Both our 400 satisfied customers as well as our employees are important to us.

That is why we are looking for someone to strengthen our team in the area of IT system integration specialized in infrastructure management.

Your skills and know-how are key! Not only are you able to professionally manage systems but also know how to use your know-how to actively contribute in implementing practice-oriented IT solutions.

Want to work for an open company that will give you the space for your own development and allow you to grow with the challenges?

**If this is for you, apply now and become part of our company and build the future with us!**

### Your benefits

- An open, appreciative company culture
- Trustworthy, positive environment
- Exciting career options
- Flexible work model
- Fair salary, permanent work contract
- Benefit for company pension, healthcare

### What you can contribute

- Your expertise in solving and processing 3rd Level support IT problems is needed
- In collaboration with other team members you help our customers design their network infrastructure on premises
- Your responsibilities include analytical and practice-oriented IT solutions for support, maintenance, host system and storage unit configuration

### How to win us over

- Successfully completed professional training as a systems engineer or a degree in computer science or similar qualification
- Ability to provide analytical, committed and communicative full customer service
- Experience with Microsoft Windows client and server operating systems
- Experience with virtualized system environments
- Team player with a hands-on mentality
- Good command of German and English
